Coursera and Google

PROFESSIONAL SUMMARY

Dynamic Full Stack Web Developer with strong expertise in JavaScript and the MERN stack, including MongoDB and Express.js. Skilled in creating efficient APIs and optimizing database models. Proficient in collaboration and problem-solving, leveraging Generative AI and rapidly adopting new technologies to enhance development workflows.

WORK EXPERIENCE

Infosys Ltd

System Engineer Trainee

April 2022 - January 2023

Job responsibilities:

- Accumulated 10 months of hands-on experience with Advanced Business Application Programming (ABAP), enhancing various project modules.
- Played a key role in diagnosing and optimizing ABAP code to improve system performance and reliability.

PROJECTS

1. Employee Productivity Tracker | [🌐](#) | [🔗](#) JavaScript | HTML5 | CSS3

- Designed and developed key frontend components such as login, signup, and homepage using HTML5, CSS3, and JavaScript.
- Facilitated the integration of task logging features enabling employees to track daily tasks with detailed information.
- Collaborated in a team of 4, contributing heavily to creating visual productivity insights using graphs and tables.

2. Coursera Clone | [🌐](#) | [🔗](#) JavaScript | React | Git | CSS3 | HTML5 | Responsive Web Design

- Utilized React and JavaScript to replicate the original Coursera interface, focusing on responsive web design.
- Collaborated with a team to implement frontend features similar to the Coursera platform.
- Gained experience in using Git for version control during the development process.
