PROFESSIONAL SUMMARY

Accomplished Full Stack Web Developer with expertise in the MERN stack, adept at crafting seamless integrations between frontend and backend components using React.js and Node.js. Skilled in leveraging Generative AI for innovative solutions and rapidly mastering new technologies. Demonstrates exceptional problem-solving abilities and collaborative spirit in team environments.

WORK EXPERIENCE

Infosys Ltd

System Engineer Trainee

April 2022 - January 2023

Job responsibilities:

- Developed proficiency in diagnosing and optimizing code performance, ensuring reliable and efficient systems.
- Contributed to enhancing project modules, which involved collaboration with a larger team to achieve project goals.
- Applied technical skills in Advanced Business Application Programming (ABAP) which laid a foundation for rapid learning of new technologies.
- Gained hands-on experience in code optimization, a critical skill for ensuring system reliability and performance.

PROJECTS

1. Coursera Clone | 🌐 | 🗣️

JavaScript | React | Git | CSS3 | HTML5 | Responsive Web Design

- Collaborated with a small team to develop a Coursera clone using JavaScript and React, focusing on frontend components.
- Assisted in implementing responsive design techniques using CSS3 and HTML5 to ensure cross-device compatibility.
- Participated in team meetings to understand project requirements and contributed to code reviews and collaborative development using Git.
- Followed best practices to create user-friendly and scalable web application interfaces.
- Gained foundational experience in web development and team collaboration, enhancing problem-solving and coding skills.

2. Employee Productivity Tracker | 🌐 | 🗣️

JavaScript | HTML5 | CSS3

- Collaborated with a team of four to develop a web application for tracking employee productivity, ensuring visibility and fairness.
- Designed and implemented responsive login, signup, and homepage interfaces using HTML5 and CSS3, enhancing user experience.
- Facilitated the logging of tasks with details such as title, description, and time spent, promoting task transparency.
- Developed visual productivity insights for employers through graphs and tables to aid in workload comparison.
- Contributed significantly to the design and development of frontend components, ensuring cohesive integration within the team.
